375 Floral Avenue
Suite 111
Chambersburg, PA 17201

David S. Hanan joined MANTEC in August 1998 and served as a Professional Business Advisor for the majority of that time. In recent years, David pursued his Six Sigma Master Black Belt. David is now the Six Sigma Development Manager for MANTEC. In this role, he will work with South Central PA manufacturers that are experiencing recurring problems in a process. The goal is to discover the root cause problem and save an organization time and money. In addition, David will teach the MANTEC Six Sigma Shop Floor, Yellow, Green and Black Belt certification courses.

Mr. Hanan brings to MANTEC clients 20+ years of experience in technical and logistical problem solving as a project manager, supervisor, and group leader involving systems, engineering and resource allocation. He was responsible for organizing, planning and completing large, complex projects as well as advising coaching, counseling, empowering people leading to personal growth and self sufficiency.

Mr. Hanan, a 6 Sigma Black Belt, has been assisting companies with Root Cause Problem Solving (RCPS) projects to help them improve their processes, as well as, training clients on the basic RCPS tools allowing them to earn 6 Sigma Yellow Belts.

Mr. Hanan gained much of his experience at Ingersoll-Rand as a Plant Manager, Manufacturing Systems Engineer and a Senior Manufacturing Engineer. Additionally he worked for Champion Road Machinery and Manufacturing Systems Consultant.

Mr. Hanan holds a Bachelor of Science Degree in Industrial Engineering and a Master of Science in Manufacturing Systems Engineering from Lehigh University.
