

Connecting Specialty Solutions for Manufacturing

LTC, INC. – STREAMLINING THE ENGINEERING

Investment to bring the CNC programming department up to date in the ever evolving world of manufacturing

Manufacturing
Technology

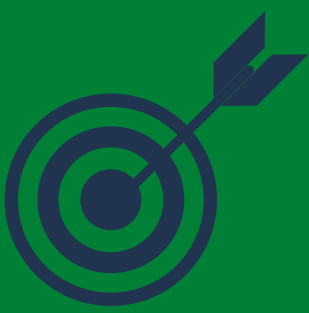

COMPANY PROFILE

LTC's provides precision machined components for defense & high technology industries.

CHALLENGE

The CAM/CNC software being used was out of date and no longer cost effective for the company to use.

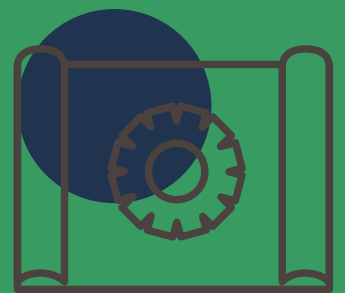

DESIRED RESULTS

To meet the high demands of their customers, a more sophisticated solution would need to be implemented to assist with streamlining the engineering and CNC programming process.

MANTEC'S SOLUTION

MANTEC's Manufacturing Technology Specialist assessed the needs of LTC and then vetted a list of software solutions narrowing it to two software companies which gave detailed demos to LTC.

RETURN ON INVESTMENT

- Improved design quality
- Reduction in design time of 50%
- Ability to add programming jobs to the company
